PROFESSIONAL SUMMARY

Forward Deployed Engineer at ekinicare, promoted in July 2026, with 5+ years across engineering and technical delivery. Builds production AI workflows and full-stack systems with Ruby on Rails, React, Python, and PostgreSQL. Experience spans LLM integrations, human review workflows, pricing optimization, and production reliability. MCA in Artificial Intelligence and Machine Learning.

TECHNICAL SKILLS

Languages: Ruby, Python, JavaScript, SQL

Backend & frontend: Ruby on Rails, Flask, REST APIs, Sidekiq, React, Next.js, Redux

AI engineering: Claude, Gemini, Vertex AI, LangChain, Model Context Protocol (MCP), structured outputs, context management, human-in-the-loop workflows

Data & delivery: PostgreSQL, Redis, AWS, Docker, GitHub Actions, RSpec, Metabase, Elasticsearch, Sentry

PROFESSIONAL EXPERIENCE

ekincare | Hyderabad, India

Forward Deployed Engineer | July 2026 - Present

- Delivered end-to-end healthcare pricing workflows: background computation, authenticated callbacks, time-segmented SKU combinations, operational review, and automated or bulk approvals.
- Migrated claims and conversational AI workflows to Vertex AI, including eight specialized agents; centralized provider configuration while preserving tool execution, fallback behavior, and usage accounting.
- Hardened MCP streaming against stalled clients with bounded socket writes and concurrency-safe cleanup; validated recovery and concurrent requests with real-socket tests.

Software Development Engineer II (Full Stack) | December 2024 - June 2026

- Built AI-assisted insurance claim adjudication with Claude and Gemini, PostgreSQL JSONB storage, and Sidekiq pipelines; connected model recommendations to human review and feedback workflows.
- Built a read-only MCP database server with SQL validation, authentication, and concurrency controls, enabling guarded database access from AI tools.
- Implemented Gemini-based diagnosis and chief-complaint extraction with Sidekiq processing and scheduled recovery for documents arriving after the initial job.
- Developed React adjudication interfaces and Metabase reporting for LLM token usage and cost, making model recommendations and operating costs visible to reviewers and engineering teams.

PROFESSIONAL EXPERIENCE - CONTINUED

YOUR-SPACE | Delhi, India

Software Engineer - Ruby on Rails | October 2023 - December 2024

- Developed Rails APIs and relational data models serving mobile, web, and CRM products, supporting 10,000+ active users and 25,000+ daily API requests.
- Optimized PostgreSQL queries and schema design; improved query performance by 35% and API response times by 25%.
- Delivered Next.js interfaces, AWS deployments with Capistrano, and Metabase reporting; automated 50+ SQL queries for operational insights.

Peepoye Network | Remote

Full Stack Engineer | June 2023 - October 2023

- Built an opinion trading platform with Rails and React, including a custom CMS, authentication, and live vote counts; migrated the company website from WordPress to Next.js.

Microverse | Remote

Code Reviewer | November 2022 - June 2023

- Reviewed Rails and React projects and mentored developers on architecture, maintainability, and Git workflows in an international remote learning environment.

Huawei Technologies | Gurgaon, India

Design Engineer | February 2021 - October 2022

- Led a 21-member project team through delivery, earning a client appreciation letter and two Star Bean Awards for customer satisfaction.

SELECTED PROJECT

Sadhak AI | github.com/rbhatt1999/sadhak-ai

- Built a multi-user AI chat application using Python, Flask, LangChain, and Gemini, with Google OAuth, PostgreSQL conversation storage, and Server-Sent Events streaming.
- Implemented rolling conversation summarization to manage context-window limits while preserving recent turns, plus Pydantic structured outputs and session/message APIs.

EDUCATION

Master of Computer Applications (MCA), AI/ML

Chandigarh University | Completed June 2026

Bachelor of Computer Applications (BCA)

Chandigarh University | July 2021 - July 2024

Full Stack Web Development Program

Microverse | October 2022 - June 2023 | 1,300+ hours

RECOGNITION

ekincare: Tech Obsession Award (2x) and Extreme Ownership Award.
